

# AUTO LIST

Guide Section: [Processing Object Data](#) | EASAP Tree: [DATA PROCESSING](#) → [LIST](#)

---

**AUTO LIST** automatically generates a sequential **LIST** of numbers or letters.

**Type:** specifies the type of list to generate and **Size:** sets the length.

|  <b>AUTO LIST</b> |   |
|--|---|
| <b>Essential Parameters:</b>   |   |
| <b>Type:</b>   | Type of list (Integer, Alphabetical Upper Case, Alphabetical Lower Case, Spreadsheet) |
| <b>Size:</b>   | Number of values to create in the <b>LIST</b> , <a href="#">Expressions</a> allowed   |

---

When a size greater than 26 is specified for an alphabetical type **AUTO LIST**, the value after Z resets back to A. This action repeats every time Z is surpassed. For a spreadsheet type, the values after Z are AA, AB, AC, etc., and will reset back to A after ZZ is surpassed.
